EO 9920/200 without and with front frame

Your Advantage

- Flush mounting- or DIN rail mounting

Features

- According to IEC/EN 61812-1
- 10 time ranges from 0.05 s ... 30 h
- Programmable on front side for
 - On delay (E)
 - Release delay (A)
 - Fleeting on make (WE)
 - Fleeting on break (WA)
- 2 changeover contacts
- Voltage range AC/DC 24 ... 240 V

Approvals and Markings

Function

The MULTITIMER EO 9920 is a multifunction relay with 10 selectable time ranges and 4 selectable functions. The device is a plug-in version for surface or DIN rail mounting with a plug-in socket. Flush mounting is also possible with an additional mounting frame for front panel installation. 2 LEDs show operational voltage and status of the output contacts. Function and time range can be selected via dip switches on the front. To control the device in function "A" off- delay and "WA" fleeting on break a volt-free contact is connected to terminals 6-7. When using the other functions 6-7 must be bridged.

Function Diagram

Indicators

- Red LED: on, when supply connected
flashes during time delay
- Green LED: on, when corresponding output relay is active

Circuit Diagrams

Assignment of connection pins	
No. of connection pin	Signal Description
2	L / +
10	N / -
6, 7	Control input (voltage-free contact) to control the functions "A" and "WA", for other functions terminals 6-7 have to be bridged.
1, 3, 4	1. changeover contact
8, 9, 11	2. changeover contact

Notes

The auxiliary supply is not buffered.
On loss of voltage or voltage interruption the output relay de-energises immediately.

48 x 48 mm with clamp screws.

Installation note: Insert the front frame without relay (acc. to DIN 43700) into the prepared 45 x 45^{+0,6} mm panel cut-out form the front. Insert the time relay also from up to the detend. Then tighten the clamping screws from behind.

To disassemble, first loosen the clamping screws, then unscrew the latching fields with a screwdriver and simultaneously push the relay forward.

For surface mounting 11-pole acc. to IEC 67-1-18a with box terminals and captive screws suitable for connecting 2 conductors 2.5 mm² solid or 1.5 mm² stranded wire with sleeve. Large-area contact with the part is prevented in accordance with the requirements of the health and safety authorities VBG 4.

Accessories - Plug in adaptor ET 4048-13 -

11-pole, from PC

For installation into control panel. The plug-in adaptor is pushed onto the relay from the plug side and then enables wiring from the rear of the device.

Version with flat plugs on request.
