

VARIMETER

Undervoltage Relay, 3-phase
IP 5201/40015

Your advantages

- The switching thresholds for undervoltage detection can be set independently of each other for all three phases.
- Protective separation between 3-phase AC voltage and auxiliary voltage circuit

Features

- According IEC/EN 60 255-1, IEC/EN 60947-5-1
- For monitoring 3-phase AC voltages
- Separately adjustable switching voltage for all 3 phases
- With neutral
- Output: 2 changeover contacts
- De-energized on trip
- Width: 70 mm

Product Description

The undervoltage relay IP 5201/40015 monitors 3-phase AC power supplies, e. g. transformer stations at energy supply companies EVU. The early detection of an imminent mains failure means that it is possible to switch over to an emergency power supply in good time. This prevents costly damage and as a user you benefit from the operational reliability and high availability of your system.

Function diagram

Applications

If the 3 phases of the power supply fall below a present switching threshold, the undervoltage relay IP 5201/40015 can be used to switch over to an emergency power supply via a DC power supply (e. g. battery).

Function

The undervoltage relay consists of three individual undervoltage relays with adjustable switching threshold and one interface relay. In good condition, the three switching contacts of the low-voltage relays are open and thus the auxiliary power supply for the interface relay is interrupted. If one of the undervoltage relays falls below the switching threshold, its relay drops out. If all three switching thresholds are not reached, the auxiliary voltage circuit for the interface relay is closed and the output relay of the interface relay responds.

Indication

- yellow LEDs: indicate that the switching voltage is below the respective switching voltage
- red LED: on, when interface relay active

Technical Data

Auxiliary Circuit

Auxiliary voltage U_H : DC 48 V, DC 110 V
Voltage range: 0.8 ... 1.1 U_N
Nominal consumption: approx. 1 W

Input

Operating voltage U_B : 3/N AC 110 V / 63.5 V
Response value: adjustable: 0.55 ... 1.1 U_B
Max. overload: 1.15 U_B , continuously
Nominal consumption: approx. 18 VA
Nominal frequency: 50 / 60 Hz
Frequency range: 45 ... 65 Hz

Output

Contacts: 2 changeover contacts
Contact material: AgSnO₂, 0,2 µm, gold plated
Measured nominal voltage: AC 250 V
Thermal current I_{th} : 5 A
Switching capacity
to AC 15:
NO contact: 3 A / AC 230 V IEC/EN 60 947-5-1
NC contact: 1 A / AC 230 V IEC/EN 60 947-5-1
Electrical life
to AC 15 at 3 A, AC 230 V: 10⁶ switching cycles
Short circuit strength
max. fuse rating: 4 A gG / gL IEC/EN 60 947-5-1
Mechanical life: 30 x 10⁶ switching cycles
