Capacitive Proximity Sensor

This capacitive sensor is designed for level control of liquids, pastes or bulk material in areas with risk of explosion: **ATEX Zone 0 (Gas) and Zone 20 (Dust)**.

The sensor body is modified for mounting in a stainless steel tube. This allows the user to make the measurement deeper in the tank.

The stainless steel tube has the article No. 196352 (with 400 mm in length)
The thread for the process connection is G1 1/2".
Triclamp and Varivent Adapter are also available.

Other tube length are available on request.

**Matching Ex barriers
can be offered
on request.**
